

## FLOW Wireless Video Transmission

3GSDI & HDMI | 5GHz DFS Comply | Strong wall-cross | Chip encryption

**FLOW500**

3GSDI&HDMI 500ft/150m

**FLOW2000**

3GSDI&HDMI 2000ft/600m

### Both SDI&HDMI in Compact Size

The Same compact size for transmitter and receiver, with NP-F DV plates and new high gain antennas.

### Anti-interference Transmission

With built-in wireless frequency scanner, the system will automatically jump to a best wireless channel from 5.1 to 5.9GHz, based on current surroundings, to ensure a reliable and anti-interference transmission. You can also switch the wireless channels manually. The OLED displays video format and wireless signal strength.

Support DFS (Dynamic Frequency Selection)

### Strong Wall-Cross Performance

Featured stronger wall-cross performance that will keep video transmission without data lost or crash comparing to regular 5GHz wireless transmitters.

### Multicast and Double Encryption

Support 1 transmitter to 4 receivers reliable multicast mode. The transmitter and receivers are paired and double encrypted by private transmission protocol and by AES128, in order to protect the footages.

### Reclock and Color Reproduction

To ensure the quality of black level, signal noise and color reproduction of the wireless received signal, the Flow series wireless receiving supports signal re-clock and accurate color reproduction.
