Panasonic NCR1850 Cells Inside

Same Power Performance as the Original Batteries

The PowerCell camera batteries adopt high-quality Panasonic cells, delivering the same electrical performance and safety as the original batteries. They provide a constant high power load, meeting the demands of high-speed burst shooting while effectively managing heat. Especially for video recording, the long-lasting and durable nature of PowerCell batteries truly stands out.

Battery Info Read

The PowerCell batteries are fully compatible with the camera system, reading battery info and the discharging curve is completely identical to the original batteries, ensuring accurate display of remaining power information.

USB-C 5V Charging Input

The PowerCell camera batteries can be charged directly using a USB-C charger or V-mount batteries with USB-C port or even a power bank, which is extremely convenient when filming outdoors. The batteries are compatible with their original deck chargers as well.

Multiple charging ways via USB-C

USB-C Chargers

USB-C V-mount batteries

USB-C Power Bank

4-LED Touch Power Indicators

The PowerCell batteries feature 4-level LED power indicators. With a touch-sensitive Power Check button, you can check the remaining battery level directly, without having to insert it into the camera. This makes it very convenient and clear when preparing for your next filming.
